

Mr. Secretary:

My name is Andrew Lee and I am a wheat, milo, soybean, and cotton in Farmer
Cowley County.

I would also like to express 'kudos' for my FSA office. I agree with the person that stated that the delivery of the Farm Bill programs should continue to be delivered by FSA. While the people in my office often struggle with new programs it's usually because the people in Washington haven't given them all the tools they need or at least ensured that the computer software worked before a signup started.

I would also like to comment on the following:

Crop insurance is a joke and waste of time
and extra paper work that is unnecessary and
very time consuming. If the government subsidy
could be given to the farmers they could ~~use~~ make
more use out of that money and also keep
the money more in the rural community, and out
of the ~~the~~ insurance companys hands

Thank You!
